EDUCATION

Course Studied

Politeknik Negeri Semarang

Associate Degree (D3) in Electrical Engineering, majoring in Electronics Engineering.

(2023 – 2026)

Course Studied

SMK Muhammadiyah Kudus

Vocational High School Diploma in Audio-Video Engineering.

(2020 – 2023)

SKILLS

- Microcontroller Programming (Arduino IDE)
- Proteus (PCB Design)
- MATLAB & Simulink
- CX Programmer (PLC)
- Microsoft Office
- Teamwork, Problem Solving, Technical Documentation.

Ahmad Rizal Abiansyah

An Electronics Engineering graduate from Politeknik Negeri Semarang with a strong interest in electronics, microcontrollers, and Internet of Things (IoT) systems. Equipped with practical skills in hardware design and software programming developed through rigorous academic and hands-on projects. I am a highly motivated professional eager to apply my technical knowledge and contribute effectively in a professional environment.

WORK EXPERIENCE

Maintenance Technician Intern

August 2025 ~ January 2026

PT Djarum Kudus

Responsible for assisting in the maintenance and troubleshooting of electronic systems and production machinery to ensure optimal operational performance. Supported maintenance activities, and gained hands-on experience in industrial work environments. Demonstrated discipline, teamwork, and adaptability during the internship period

PROJECT EXPERIENCE

Greenhouse Climate Monitoring and Control System

2025

- Developed an automated system to monitor and control climate conditions within a greenhouse using Arduino Uno.
- Integrated DHT sensors for temperature and humidity and LDR sensors for light intensity measurement.

Smart Locker RFID with Telegram Bot Notification

2025

- Designed and constructed a security system for lockers using RFID technology for access control.
- Integrated a Telegram Bot feature to provide real-time entry and security notifications to the user's smartphone.

Design and Construction of HLP Machine Control Panel based on OMRON CS1G PLC

2025-2026

- Engineered and assembled a specialized control panel for HLP (Hinge Lid Packer) machinery using OMRON CS1G PLC systems.
- Integrated hardware components and programmed logic sequences to enhance machine automation and reliability.
